Members of the public: Kirk Spofford, Peter Flynn

Motion made to approve minutes of January by Marko— second by Brooks. Approved. Abstain: Costello, Denis, Dias.

Jarrold addressed legal opinion from NHMA about possibility of including housing opportunities with a new facility.
Pursuant to an email:

There is a possibility for this to happen, although it would be complicated, and I am not sure if it would operate in the way you are hoping. RSA 203:4 allows for a municipality to allow for the creation of a state-run housing authority. This is essentially the statute that allows for the creation of housing projects. It is possible that under the authority granted in this statute, a municipality could create long term housing options for rent to municipal employees. However, the state would be in control of the housing, and I don't think there is a way you could totally limit this housing to only municipal employees.

Police and fire departments are allowed to have temporary housing accommodations for overnight shifts, but these cannot be rented long term to one specific individual.
